No One Behind

-Digital skills for young adults-

Ciprian Barsan

Why digitalization is necessary

1. Adults in rural areas face difficulties in developing digital skills, which hinders their social and economic integration in today's digital world.
2. In Eastern Europe, where rural regions are predominant, this lack of digital skills is particularly pronounced, affecting the region's development and competitiveness.
3. People in rural areas struggle to access online services, engage in online learning, and participate in digital entrepreneurship due to limited digital knowledge.
4. The absence of digital skills can result in exclusion from employment opportunities, restrict participation in the digital economy, and limit access to essential services such as healthcare and government resources.
5. Our projects are essential in addressing these challenges by providing training and support to enhance digital skills among adults in rural communities.
6. By empowering individuals with digital skills, we can unlock their potential, actively involve them in the digital society, and ensure that no one is left behind in the digital era.

Main results of the project

Instruction

Module 1: Information processing

Module 2: Communication

Module 3: Content creation

Module 4: Security

Module 5: Problem solving.

Active learning

EDUCATIONAL GAME that can be accessed by users through the computer

No One Behind

BOARD GAME

Co-funded by the Erasmus+ Programme of the European Union

- Player pawns
- Round counter
- Question card back
- Question card counter
- Player Hand
- Event counter
- Event card back
- Stamp counter

www.no1behind.org

Project outcomes - Multiplying and Use

Local authorities

- Taxes paying
- Submission of documents
- Receipt of documents

Schools

- Online lessons for small kids
- Online catalogues
for school situation

Local businesses

- Tourism info
- Small businesses

These really works !!!

- Use clear and simple language: Avoid technical jargon or complex terminology. Communicate in a language that is easily understandable by the target group, using plain and straightforward language.
- Visual aids and infographics: Utilize visual elements such as charts, games, and infographics to convey information in a more visual and intuitive manner. Visual aids can help simplify complex concepts and make them more accessible to the target group.
- Break down complex processes or concepts into smaller, manageable steps. Provide clear instructions and guidance on how to acquire and apply digital skills, ensuring that participants understand the progression and can follow along easily.
